Office Action Summary	Application No. 10/540,404	Applicant(s) MIZUKURA ET AL.	
	Examiner KELLY L. JERABEK	Art Unit 2622	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is a first office action in response to application 10/540,404 filed on 6/23/2005 in which claims 1-5 are presented for examination.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statement filed 6/23/2005 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

The information disclosure statement (IDS) submitted on 5/15/2006 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Drawings

Figures 1-4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamada US 2002/0012463.

Re claims 1 and 5, Yamada discloses an image pick-up apparatus (10) and image pick-up method including an image pick-up device unit (CCD 12) comprised of color filters (R, G, B) having different spectral characteristics, and serving to pick up an image of an object (page 3, paragraphs 36-37), the image pick-up apparatus (10) comprising: adjustment means (22) for adjusting color reproduction value and noise value representing noise feeling (page 3, paragraphs 37-39 and page 3, paragraph 47- page 4, paragraph 99); matrix coefficient determination means (20) for determining matrix coefficients on the basis of the adjustment means (22); and matrix transform processing means (20) for performing matrix transform processing with respect to an image which has been picked up at the image pick-up device unit (12) on the basis of the matrix coefficients (page 3, paragraph 65-page 4, paragraph 99).

Re claim 2, Yamada further states that the adjustment means (22) serves to adaptively adjust the color reproduction value and the noise value in accordance with

image pick-up sensitivity of the image pick-up apparatus (10) (page 3, paragraphs 38-39).

Re claim 3, Yamada further states that the adjustment means (22) serves to adaptively adjust the color reproduction value and the noise value in accordance with the environment (in accordance with information from the lightness detection section 16 or sensitivity setting section 18) where the image pick-up operation is performed by the image-pick up apparatus (10) (page 3, paragraph 38- page 4, paragraph 99).

Re claim 4, Yamada further states that the adjustment means (22) arbitrarily adjusts the color reproduction value and the noise value of the images signal (page 3, paragraph 38-page 4, paragraph 99).

Contacts

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kelly L. Jerabek whose telephone number is **(571) 272-7312**. The examiner can normally be reached on Monday - Friday (8:00 AM - 5:00 PM).
